Professional Experience

Ford Sept. 2022 – Present
Bluetooth Software Developer *Waterloo, Ontario*

- Developed and maintained Bluetooth software across native C++, Java, and AOSP components, implementing new features and APIs to support vehicle infotainment functionality.
- Diagnosed and resolved critical, release-blocking Bluetooth defects through root-cause analysis and software fixes across multiple layers of the Android Bluetooth stack.
- Led Bluetooth media requirements development, defining system behavior, addressing edge cases, and driving technical design discussions for a new software framework.
- Led co-op recruitment across multiple hiring cycles, screening resumes, conducting technical interviews, selecting candidates, and mentoring new developers.
- Collaborated directly with Google and mobile device vendors to investigate complex Bluetooth and Android framework issues, coordinating testing and driving defect resolution across software platforms.
- Resolved a critical vehicle system performance issue by implementing Bluetooth resource controls, reducing Bluetooth CPU utilization by 97% during affected operations.

Untether AI Sept. 2021 – Dec. 2021
AI Accelerator Software Engineering Intern

- Developed and tested C++ optimizations to reduce packet latency while minimizing impact on throughput.
- Built performance-monitoring functionality for AI accelerator workloads and validated software components using GoogleTest and Pytest.

Ford Jan. 2021 – Apr. 2021
Embedded Analytics Developer Intern

- Developed and maintained embedded C++ analytics software to collect diagnostic logs and performance metrics from vehicle hardware.
- Implemented additional instrumentation and logging capabilities to identify potential performance bottlenecks.

Providius Sept. 2019 – Dec. 2019
Software Developer Intern

- Reimplemented Python code in C++ to improve runtime by 50% and optimized WebSocket handling to support 2,000+ additional streams.
- Independently developed and maintained an Angular component library and supporting APIs for two new software products.

ecobee Jan. 2019 – Apr. 2019
Server Developer Intern

- Developed Java REST APIs to access and modify user and device data.
- Automated AWS infrastructure deployments using Terraform and developed a schema-generation tool for device validation.

Technical Skills

Languages: C++, C, Java, Python, JavaScript
Tools & Technologies: Android, AOSP, JNI, AIDL, Perfetto, GDB, Valgrind, AWS, Terraform
Frameworks & Protocols: React, AngularJS, Flask, Bluetooth

Education

University of Waterloo Sept 2017 – Apr 2022
Bachelor of Applied Science, Computer Engineering *Waterloo, Ontario*
