Education

University of Waterloo Sept 2017 – Apr 2022
Bachelor of Applied Science, Computer Engineering *Waterloo, Ontario*

Professional Experience

Ford Sept. 2022 – Present
Bluetooth Software Developer *Waterloo, Ontario*

- Extended the Bluetooth framework to propagate native ACL and profile connection failure events through Java APIs, enabling application-layer handling of failed Bluetooth connections.
- Analyzed issues found in testing and customer vehicles to identify and resolve bluetooth issues, collaborating with external device vendors when necessary
- Developed Bluetooth APIs to be used by other teams to access data and control Bluetooth functionality
- Other responsibilities included creating high-level requirements of the Bluetooth media code based on customer use cases, leading the coop hiring and mentoring process, coordinating releases of the Bluetooth software
- Designed and implemented Bluetooth control APIs to manage resource-intensive Bluetooth operations, improving system responsiveness and reducing CPU utilization by 97% through performance optimization.
